TOTAL AMOUNT	8.315 €

* At iGin or otherwise, remote follow-up

- **Fixed Price:** This is a fixed price treatment that includes the services detailed on the cost breakdown. Supplementary tests may be required according to medical criteria, however, these would be notified in advance.
- **Validity:** The validity of this estimate is 6 months from the date of your first consultation.
- **Medication:** Medication costs are not included. These will be assumed by the patient.
- **Embryo devitrification:** when an embryo transfer fails, an additional cost of 1690€ will apply to subsequent attempts.
- **Cancellation by the patient:** In case of cancellation of the treatment, the patient must pay the costs incurred until that point.
- **After 2 years of embryo cryopreservation:** it will be your decision to either choose from one of the authorised applications regarding embryo donation/destruction or the payment of a 395€ fee per year of conservation for future use.
- **Sperm preservation:** sperm freezing has a cost of 215€ (valid for a year), with a subsequent maintenance fee of 210€ per year.
- **Guarantees:**
 - A minimum of 8 mature donor oocytes is guaranteed.
 - We guarantee at least 2 blastocyst-stage embryos. In the event of this not happening or if there is only 1 embryo and the patient does not get pregnant or suffers a miscarriage, and when the treatment is to be repeated, the patient will only have to pay for the embryo transfer fee; the remaining costs will be covered by the clinic. (This guarantee does not apply in case of male factor infertility).
