- **Fixed Price:** This budget has a fixed price. In some cases it may be necessary to provide a medical prescription, a service and/or additional evidence not included in the budget, which you will be informed in advance.
- **Validity:** The validity of this budget is 6 months, from the date of visit.
- **Medication:** By law, the medication is not included and is borne by the patient.
- If an embryonic devitrification is needed (if not pregnant on the first attempt), an additional cost of € 1690 is required.
- **Cancellation by the patient:** In case of cancellation of treatment, the patient must pay the costs incurred until the stopping of such treatment.
- **After the first 2 years from the pre-embryonic freezing:** The patient must decide whether to allocate the embryos to any legally authorised applications, or, if instead to pay the embryo maintenance fee. Which is the amount of € 395 per year.
- If necessary **freezing of sperm**, an additional amount of € 210 is required .
- The price **with donor sperm** increases € 380.
- We guarantee a **minimum of 8 eggs** from the donor and at least **two blastocyst stage embryos** the day of embryo transfer. If the embryos do not reach the day of the transfer or if we only have one viable embryo the day of the transfer and the patient did not get pregnant, we offer another cycle of egg donation at no extra cost, **excluding donor medication**. *This warranty does not apply in case of severe male factor according to WHO criteria or when using testicular biopsy.*
