- **Fixed Price:** This budget has a fixed price. In some cases it may be necessary to provide a medical prescription, a service and/or additional evidence not included in the budget, which you will be informed in advance.
- **Validity:** The validity of this budget is 6 months, from the date of visit.
- **Medication:** By law, the medication is not included and is borne by the patient.
- **If an embryonic devitrification is needed** (if not pregnant on the first attempt), an additional cost of € 1690 is required.
- **If you need additional stimulations** (oocyte accumulation), each stack will have an additional amount of € 2 230.
- **Cancellation by the patient:** In case of cancellation of treatment, the patient must pay the costs incurred until the stopping of such treatment.
- **In case that it doesn't reach the transfer for no evolution pre-embryonic**, you will be credited € 160 in respect of such transfer not performed.
- **After the first 2 years from the pre-embryonic freezing:** The patient must decide whether to allocate the embryos to any legally authorised applications, or, if instead to pay the embryo maintenance fee. Which is the amount of € 395 per year.
- If necessary **freezing of sperm**, an additional amount of € 210 is required .
- The price **with donor sperm** increases € 380.
